Subject: DOJ/Microsoft Antitrust Settlement

It is quite amazing and funny to watch the game between DOJ and Microsoft. In the Clinton period MS was told to split the company; now it's Bush time and a penalty combined with some charity will do it. It's called a settlement, I think even DOJ can not compete with the army of lawyers from MS. If DOJ accepts this settlement, MS shall even extend its monopoly on the desktop. It's impossible they can get out of it that easy.
